MEMORANDUM
TOWN OF PONCE INLET OFFICE OF THE PUBLIC SAFETY DIRECTOR

The Town of Ponce Inlet staff shall be professional, caring, and fair in delivering community excellence while ensuring Ponce Inlet citizens obtain the greatest value for their tax dollar.

To: Mike Disher, Town Manager AICP, Town Manager

From: Daniel Scales, Public Safety Director

Date: September 6, 2024

Subject: August 2024 Fire Department Report

Attached to this memo are the following items.

- Department incident summary for the month of August (with graph)
- Incident concentration heat maps
- August fire training summary for the fire department
- Summary of activities from the fire department Office Manager

The Ponce Inlet Fire Department (PIFD) responded to 93 incidents for the month of August, with 66 of the responses falling under the EMS category.

The fire department transported 53 patients in August: 28 transports from Ponce Inlet, 25 from out-of-district; the average number of transports in 24 hours was 1.8.

In August the fire department continued its firefighting skills training by practicing driver training of the fire apparatus and conducting hose deployment drills.

The department also visited various condominiums and commercial properties updating pre-fire response plans.

A Driver/Engineer promotional process was conducted with three employees competing for the position. Assessors from neighboring departments assisted as evaluators in the process. The final results of the process will be announced in September.

As we head into the peak of hurricane season, remember that it only takes one storm to impact the community. Individual storm preparations are essential to assure you are as prepared as possible for any event.

Please check out the Town's website for additional emergency management information.

Fire Department turnout data is included with the other call related information. The fire department's goal is to have the 90th percentile time for both medical and fire calls meet the NFPA standards. In August, the fire department met the 90th percentile for fire responses. The 90th percentile for fire department EMS responses for August was close to the NFPA standard.

To provide the public with more fire department response data, we are including hyperlinks to heat maps of the various fire department responses. The intent of the heat maps is to demonstrate concentrations of calls within the community. This is a requirement of the accreditation process. Links to the heat maps can also be found on the Town's website under the fire department section.

NOTE: Each map link will launch in an individual web browser.
